

JPTC Laparoscopic training room that fits in your bag

Shifting the view for new beginnings

Introduction to products already deployed or considered for deployment overseas

Our training needle holders, LapaSta, Palm Camera Stand, and the Kanji surgical model "WA," all specially designed for laparoscopic suture training, have been adopted as standard training equipment by IRCAD Taiwan, which attracts doctors from all over Asia. This is proof of our products' effectiveness in laparoscopic surgery training.

For inquiries or business meetings

- Hospitals providing endoscopic surgeries
- Hospitals and dealers looking for an endoscopic suturing training device for surgeons, obstetricians, and gynecologists
- Hospitals intending to introduce endoscopic suturing training
- Surgeons, obstetricians, and gynecologists who have the opportunity to participate in overseas academic meetings
