

# Technology to Bring Health Disparities to Zero

Our goal is to spread helmet therapy, which is only available to a limited number of regions and people, to a wide range of people who need it, regardless of where they live or their economic situation.

## Introduction to products already deployed or considered for deployment overseas

### Cranial Remolding Orthosis (Helmet) "baby band"

This therapy device is designed to reshape cranial deformities in babies.

It is a safe treatment, only inducing the growth of a baby's head (without applying pressure to reshape it).

Originating in the USA, its use is rapidly spreading in Japan.
