

# Walk on Your Own Feet for Life

## KURUA® app for “rehabilitation with a smartphone”

An application that meets the needs of individuals and healthcare settings and revolutionizes digital health from prevention to treatment.

### Introduction to products already deployed or considered for deployment overseas

KURUA® was designed under the concept of encouraging health promotion through the P-C-R-D-C cycle. It has been developed to serve patients outside of facilities and connect facilities and patients.

It is important to provide exercise and rehabilitation that are suited to the individual, and this program allows for safe, continuous exercise without strain.

### For inquiries or business meetings

- Hospitals, clinics
- Nursing-care facilities
- Medical device distributors
- Companies promoting health management

### Top 5 strengths of our company

- 1 Provides proprietary exercise therapy supervised by physicians and physiotherapists
- 2 Joint range-of-motion measurement system based on 3D skeletal estimation technology from video recordings (patent pending)
- 3 The app that connects people and functions to replace supervision
- 4 Pursues the link between walking and gait (medical device under development)
- 5 Collaboration with orthopedic surgeons and healthcare facilities

### Why we are chosen

- 1 Unprecedented motor-specific application
- 2 Highly usable products reflecting customer feedback
- 3 Unrestricted by place and time and can be used in any environment

### Why we are trusted

- 1 Product development that reflects the voices of individuals and healthcare practices
- 2 Provision of evidence-based exercise therapy
- 3 Commitment to safety
