

Automated Patient Screening & Analytics System: An Ally for Busy Medical Professionals

Based on data from clinical trials conducted in Japan and Vietnam, the system will continuously be developed in a national university laboratory in Japan, to relieve the heavy workload of hospitals in Vietnam.

Introduction to products already deployed or considered for deployment overseas

- Non-contact measurement of body temperature, heartbeat, and respiration via thermal imaging sensors
- High-precision symptomatic screening via AI machine learning algorithms
- Software featuring advanced image processing technology
- Clinical evaluation collaborating with infectious disease hospitals overseas

For inquiries or business meetings

- Hospitals
- Research institutes
- Medical device development companies
- Government agencies

Top 5 strengths of our company

- 1 Advanced R&D capabilities unique to a university-launched venture company
- 2 Multilingual support, including for Vietnamese
- 3 Completed clinical studies in Japan and Vietnam
- 4 Product development tailored to local needs
- 5 Number of patents granted

Why we are chosen

- 1 Commitment to a field-oriented approach, including international customers
- 2 Presence of local partners in Vietnam
- 3 Actionability

Why we are trusted

- 1 Patenting of elemental technologies
- 2 Principle verification published in international specialist journals
- 3 Interviews and field surveys to meet needs

Company Information

Company Name : Sun Lab Co. Ltd.
Address : Building W-11 (Innovative Research Building),
The University of Electro-Communications
1-5-1 Chofugaoka, Chofu-shi, Tokyo 182-8585, Japan
