

With our gait-assist platform, we aim to increase healthy life-expectancy and create a society where people remain active and radiant at all ages

A wearable gait-assist robot that aids walking according to the rhythm of gait, coupled with a gait analysis system that quantitatively measures and analyzes the gait characteristics and the effects of rehabilitation.

Introduction to products already deployed or considered for deployment overseas

This gait analyzer enables quantitative measurement and analysis of gait characteristics and rehabilitation effects. Using wearable sensors, the gait trajectory of each step along with that of the waist can be measured and analyzed. The gait characteristics are shown in an easy-to-understand manner, making it simple to provide feedback to the patient, leading to increased patient motivation.

For inquiries or business meetings

- Hospitals, clinics
- Rehabilitation and nursing care facilities
- Medical device distributors

Contact Person : Akio Kikuchi, General Manager, Sales Dept., Management Division

Top 5 strengths of our company

- 1 Gait-assist platform to support walking
- 2 A venture originating from the Tokyo Institute of Technology for social implementation of cutting-edge technology
- 3 Cutting-edge technology combining AI and big data with extensive clinical experience
- 4 Social implementation of innovative robotics and state-of-the-art sensing
- 5 Developing services for medical institutions, universities and other research institutions, and consumers

Why we are chosen

- 1 Provides unparalleled value in gait support and analysis
- 2 Gait analysis systems that can be covered by insurance
- 3 Gait analysis that is easy for healthcare professionals to understand and enhances patient motivation

Why we are trusted

- 1 Proven results of introduction in several medical institutions and insurance coverage
- 2 Product development based on the needs of the medical field
- 3 Six domestic and international patents registered

Company Information

Company Name : WALK-MATE LAB Co. Ltd.
Address : 7-6 Azumacho, Hachioji-shi, Tokyo
192-0082, Japan
TEL : +81-42-649-4811
